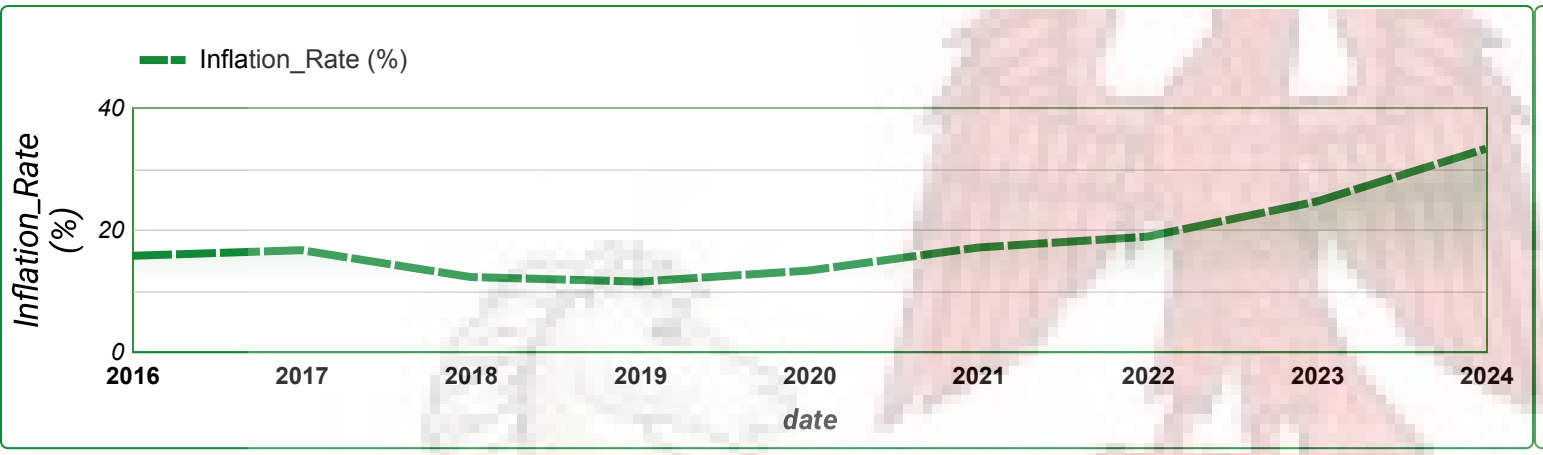
Nigeria's Inflation Dynamics (2016–2024): Trend, Volatility & Structural Shifts

Jan 1, 2016 - Dec 31, 2024

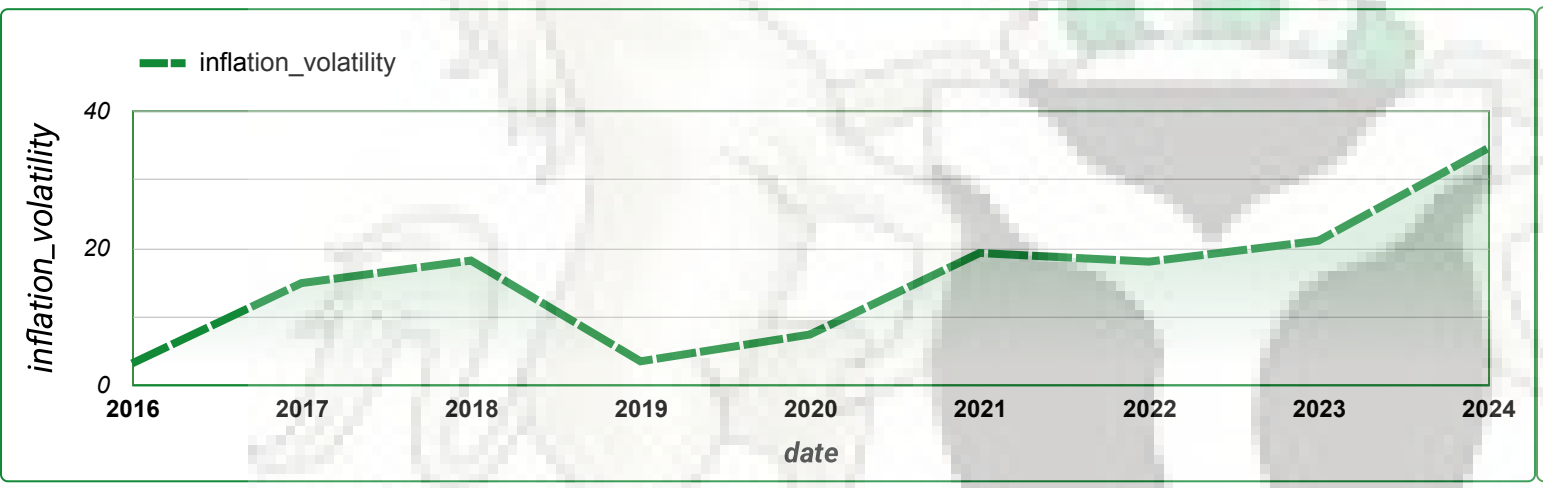
Inflation Rate (YOY)



Key Insight1

Nigeria's inflation trajectory shows a clear structural acceleration post-2022, suggesting a regime shift driven by exchange rate adjustments, subsidy reforms, and supply-side shocks.

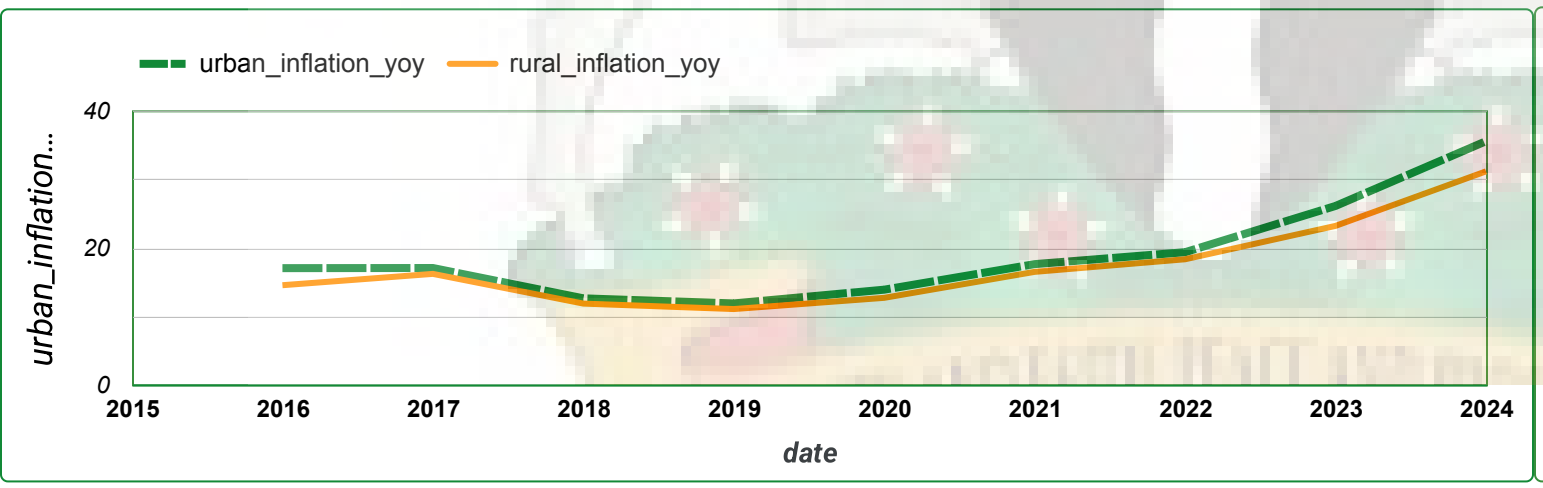
Inflation Volatility



Key Insight2

Inflation volatility has increased significantly since 2022, indicating reduced price stability and heightened macroeconomic uncertainty.

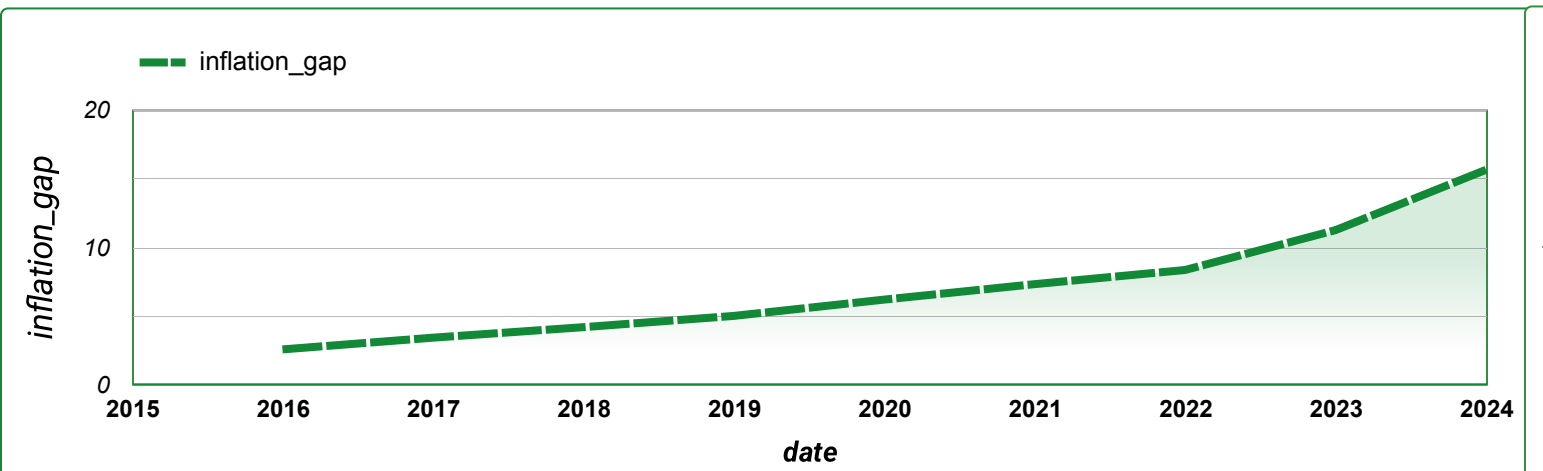
Urban VS Rural Inflation Gap



Key Insight3

Urban inflation has remained persistently above rural inflation, indicating stronger demand-side pressures in metropolitan areas.

Inflation Gap



Key Insight4

The widening urban–rural inflation gap suggests increasing structural divergence in cost-of-living pressures, with urban households bearing a disproportionately higher inflation burden.
